MTN Business Azure Services

#BusinessDoneBetter

The background of the slide features a repeating pattern of the MTN logo, which consists of the letters 'MTN' in a bold, sans-serif font, enclosed within a yellow oval. The pattern is arranged in a grid and is most prominent on the left side of the slide, fading towards the right.

Intelligent security, seamless hybrid capabilities, and unique cost savings options

MTN Business is a Microsoft Silver Partner, and we are offering SME and Large Enterprises publicly hosted Infrastructure, Platforms & Software through the Microsoft Azure environment. This is a scalable service that is offered through a pay as you go model on the MTN Business WebStore.

The best of Azure

A recent study found that enterprise customers considering cloud migration for Windows Server were 30% more likely to choose Azure due to its intelligent security, seamless hybrid capabilities, and unique cost savings options.

The Azure cloud platform is more than 200 products and cloud services designed to help you bring new solutions to life—to solve today's challenges and create the future. Build, run, and manage applications across multiple clouds, on-premises, and at the edge, with the tools and frameworks of your choice. These applications orchestrate the configuration and operation of virtualized hardware and software on those servers. The orchestration of these servers is what makes Azure so powerful.

MTN is a Certified Microsoft Partner

Customers can take advantage of SA best Network to access the Azure Infrastructure

Speeding novel solutions to market is a key reason for migrating to the cloud. Achieving this goal requires freeing IT and development talent from management tasks like support. Moving Windows Server and SQL workloads to Azure provides flexible, scalable, and highly available cloud infrastructure, while supporting rapid innovation and digital transformation—freeing you to innovate.

A division of responsibility

In an on-premises datacenter, you own the whole stack. As you move to the cloud some responsibilities transfer to Microsoft. The following diagram illustrates the areas of responsibility between you and Microsoft, according to the type of deployment stack.

Responsibility		SaaS	PaaS	IaaS	On Prem
Responsibility always retain by the customer	Information and data	●	●	●	●
	Devices (Mobile and PCs)	●	●	●	●
	Accounts and identities	●	●	●	●
Responsibility varies by type	Identity and directory infrastructure	●	●	●	●
	Applications	●	●	●	●
	Network Controls	●	●	●	●
	Operating system	●	●	●	●
Responsibility transfers to cloud provider	Physical Hosts	●	●	●	●
	Physical Network	●	●	●	●
	Physical Datacentre	●	●	●	●

Product Options and Features

MTN Business Azure Services can be broken down into three primary offerings:

Virtual Machines

These are one of Azure's main offerings in the Compute group. This service helps to create Windows as well as Linux virtual machines almost instantaneously. The most important feature of this Azure platform is the VM's services as per your requirements. Microsoft Azure will enable you to get Compute-optimized VMs, Burstable VMs, general-purpose VMs, as well as Memory-optimized VMs.

Azure Backup

The backup service of Azure is also amongst the most well-known Azure web app services which are extremely in-demand amongst enterprises. An azure backup is a perfect tool to simplify data protection against ransomware and human errors. It happens to be an inexpensive backup solution that needs only a single click. This service can be used for the backup of SQL workloads as well as Azure Virtual machines.

Azure Virtual Desktop

Azure Virtual Desktop, formerly known as Windows Virtual Desktop, is a Microsoft Azure-based system for virtualizing its Windows operating systems, providing virtualized desktops and applications securely in the cloud. It is aimed at enterprise customers rather than at individual users with exclusive features for flexibility as well as simplicity. Azure Site Recovery can be set up in some simple steps by means of replicating an Azure Virtual Machine various Azure locality. Arranging multi-tiered programs operating on different virtual machines in a series tends to reduce recovery problems. Most critical of all, by allowing Site Recovery, you will ensure conformity with industry regulations such as ISO 27001.

Unmatched offering

Only cloud provider with end-to-end hybrid infrastructure

- Identity
- Operating Systems
- Application Platforms
- Data Platform
- Security + Management

Unmatched Security

Intelligent security and performance features mean consistent and predictable workload performance

\$1 billion per year investment in security

6.5 trillion threat signals analysed daily

3,500 dedicated security experts

Optimise your Costs

The lowest cost of ownership by combining unique pricing options and extended security updates

Pay per use model to reduce bill shock

Reduce cost by sizing Azure resources

Special subscription offers

Next Gen Innovation

Fully-managed infrastructure and services, freeing you up to spend more time creating

Only cloud with evergreen SQL

Unique, built-in resource management

Only fully-managed service for .NET app

Benefits to live by

Easily connect your on-premises servers to Azure using Windows Admin Center to take advantage of cloud backup, monitoring, disaster recovery, and storage

Windows Virtual Desktop	Windows Server and SQL Server
Platform of your choice	Better Integration
Windows differentiation	Better compatibility
Enhanced protocol	Less support needed
Containerized User Profiles	Leverage existing Windows and SQL skills
<p>MTN Business offers 8-5 first line support, with the backing of our Microsoft Advanced Support for any escalations</p>	

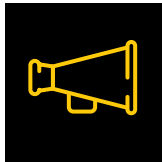

Sometimes, more is more

We are aware that each business has unique requirements and many cogs that keep the machine running. The following products have been selected as enhancements to your new **MTN Business Azure Service**.

Office 365

Keep your office connected, up-to-date and collaborating at the most efficient level with Microsoft Office 365. Benefit from the industry leading software connected by South Africa's best network.

Omni-Channel Engagement

Ensure that communication with your customer is always top of mind. Bulk SMS, Chat Bots, Email Services and Reversed Bill URL from MTN Business will ensure effective customer engagement.

Fixed LTE

MTN Fixed LTE delivers LTE connectivity to a fixed location, such as an office building or home office. Using MTN's award winning LTE network, this service is ideal for small to medium sized businesses looking for an affordable, fast and reliable internet based product.

Fibre to the Business

MTN Business Broadband Fibre delivers high speed, symmetrical business-class internet access – ideal for businesses requiring a reliable and efficient alternative to DSL and mobile broadband solutions.

Fixed Voice

Connecting your system to our network via Internet Protocol (IP) allows your private branch exchange (PBX) to support seamless video conferencing, cheaper internal voice calls and data over your corporate network while running standard voice telephony across public telephonic networks.
